

VICTORIA

QUARTERLY ABSTRACT OF STATISTICS

No. 20—September 1951

Issued under the authority of the Honorable
the Chief Secretary

by

O. GAWLER, F.I.A.
Government Statist

By Authority :
J. J. GOURLEY, Government Printer, Melbourne.

Copies may be obtained at the Office of the Government Statist,
Melbourne.

INTRODUCTION.

Victoria is situated at the south-eastern extremity of the Australian continent of which it occupies about a thirty-fourth part, and contains about 87,884 square miles. It lies approximately between the 34th and 39th parallels of south latitude and the 141st and 150th meridians of east longitude. Its greatest length from east to west is about 493 miles, its greatest breadth about 290 miles and its extent of coast-line (including the length around Port Phillip Bay, Western Port, and Corner Inlet) 980 miles. It is bounded on the north and north-east by New South Wales from which it is separated by the River Murray and by a straight line in a south-easterly direction from a place near the head-waters of that stream, called The Springs, to Cape Howe. On the west it is bounded by South Australia and on the south and south-east its shores are washed by the Southern Ocean, Bass Strait, and the Pacific Ocean.

The climate of Victoria is characterized by warm summers, rather cold winters, and rain in all months. Mean temperatures in midsummer (January) range from 65 deg. (Fahr.) in the south to 75 deg. (Fahr.) in the north-west, corresponding means of daily maxima being 80 deg. (Fahr.) in the south and 90 deg. (Fahr.) in the north-west. In midwinter (July), the mean temperature is generally below 50 deg. (Fahr.), mean of the night minima being below 40 deg. (Fahr.).

ACKNOWLEDGMENT.

Much of the information in this "Abstract" is obtained from the Commonwealth Statistician and other authorities. Acknowledgment with thanks is made to all those responsible for the furnishing of these particulars.

(a) Excluding wage earners in rural industry, female domestics in private household, Defence Forces at home or abroad, and Government "relief" workers. Estimated total employment is based on Pay-roll Tax returns and records of Government employment. All figures for months subsequent to May, 1945 (Factories, June, 1948) subject to revision.

(b) Civilian employees of Commonwealth, State, Local and Semi-Government, and Allied Government Authorities. Old basis subject to revision.

(c) From July, 1948, the monthly figures are estimates subject to revision.

(d) Includes Law and Order, Religion, &c., Health, Education, Other Professional Services, Entertainment, &c., and Personal Service (Hotels, Restaurants, &c., *excluding* female private domestic).

(e) Not available.

VICTORIA—UNEMPLOYMENT IN TRADE UNIONS.

The quarterly figures show the number of persons who were reported out of work for three days or more during a specified week in each quarter; they include sickness but not persons out of work through strikes or lockouts, except those outside the industry concerned who are indirectly affected. The annual figures represent the average of the four quarters.

(a) Peak of unemployment.

Note.—The unions covered by the returns, which are furnished to the Commonwealth Statistician, represent about 60 per cent. of the total membership of unions, and relate to between 20 and 25 per cent. of all wage and salary earners. The value of the percentages of unemployment derived from Trade Union returns is in the indication they give of the trend of unemployment among trade unionists as reported by secretaries of Trade Unions.

Note.—The above index has been computed by the Commonwealth Statistician.

MELBOURNE WHOLESALE PRICE INDEX-NUMBERS.

The index of wholesale prices was first computed by the Commonwealth Statistician in 1912 and relates chiefly to basic materials and foods weighted in accordance with consumption in the years immediately preceding that date. Neither the component items nor the weighting have been varied. Consequently the index is a measure of changes in wholesale price levels based on usages which have altered substantially since the period on which the weighting was determined. As such it is useful as an indication of long-term trends over the past 89 years which it covers, on the assumption that the relative importance of component items remained constant. But it no longer serves as a measure of price variations from month to month or from year to year of commodities weighted in accordance with present-day consumption. Reference to a description of the index published in the annual *Labour Report*, issued by the Commonwealth Statistician, will indicate that animal fodders preponderate in the "Agricultural Produce" group, while "Building Materials" include little besides imported timber. In other groups, some principal items have increased in consumption while others have decreased. A new wholesale price index, covering basic materials and foodstuffs, has therefore been computed, in which the items have been regrouped and reweighted as indicated, and comparative index-numbers back to 1928-29 are published in the next statement.

WHOLESALE PRICE INDEX-NUMBERS—BASIC MATERIALS AND FOODSTUFFS.

Following a conference of Statisticians in 1930 an index by the Commonwealth Statistician has been computed from new data on prices and consumption. Both in contents and method of computation it differs from the Melbourne Index of Wholesale Prices published in the foregoing statement. The price quotations have in the main been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

(Base : Average 3 years ended June, 1939 = 100.)

(a) Represents only such imported commodities as are included in the wholesale price index. This index does not measure changes in price of imports generally. (b) This computation includes the price of raw wool for local manufacture. For computation using auction room price of wool see note (b) below.
(c) Revised figures.

Note (b)—

WHOLESALE PRICE INDEX.

BASIC MATERIALS AND FOODSTUFFS.

Legislation which became effective on 14th December, 1950, had the effect of reducing (by bounty) the price paid for raw wool for local manufacture in Australia below the open market (auction room) price. Such reductions were virtually retrospective to August, 1950, and continued until 30th June, 1951. The effective prices paid for raw wool for local manufacture (i.e., auction room price less bounty) have been used in calculating the index published in the above statement. Below are shown these same indexes calculated on the auction-room prices for wool. Only the four columns marked (b) above are affected, and only these are shown below.

(a) Excluding age and invalid pensioners in benevolent asylums.

(b) During 1939-40 all invalid pensions in force were specially reviewed and, at 30th June, 1940, all those pensioners who had become qualified for age pensions by age and residence were transferred to the age pensions list.

(c) Commenced from 1st July, 1942. Particulars exclude pensions payable to widows in benevolent asylums.

(d) The income restrictions imposed in 1931 and 1932 and modified in 1934, 1936, and 1937 were abolished as from 1st July, 1943.

(e) Not available.

(f) Commenced from 1st July, 1941. Particulars exclude endowed children in approved institutions.

(g) As from 20th June, 1950, endowment became payable in respect of all children under sixteen years of age in a family.

| Total Primary | 207,982 | 15,722 | 192,260 | 21,091 | 171,169 | 78 17 4 |
| Manufacturing (d) .. | 219,245 | .. | 219,245 | .. | 219,245 | 101 0 6 |
| Total all Industries .. | 427,227 | 15,722 | 411,505 | 21,091 | 390,414 | 179 17 10 |

(a) Gross value is defined as the value placed on recorded production at the wholesale price realized in the principal markets. In cases where primary products are absorbed locally, or where they become raw material for secondary industry, these points are presumed to be the principal markets.

(b) Costs of production include stockfeed, seed costs and pickling, manures, spraying, sheep and cattle dips, power, fuel, water, and all other materials used in production, but exclude depreciation and maintenance costs.

(c) Not available.

(d) Manufacturing is included at its net or added value because the gross or wholesale selling value contains so much duplication of products, the finished article of one class of manufacture forming in numerous cases the raw material for others.
